

Healthy Turf™ 8-1-9

A natural biofertilizer formulated to provide nutrients to turfgrass. It contains NPK fertility derived from organic and natural sources, and includes beneficial rhizosphere bacteria to boost biological soil fertility. Healthy Turf™ 8-1-9 is manufactured as homogenous mini granules that penetrate easily through the turf canopy. It provides rich organic material and active rhizosphere bacteria to depleted soils. *Healthy Turf™ 8-1-9*:

- Provides NPK fertility derived from natural sources
- Slowly releases its nutrients as it biodegrades
- Increases the organic content of the soil
- Acts as a food source for its beneficial bacteria
- Introduces six selected species of beneficial bacteria that fix nitrogen from the air, solubilize phosphorus, and release minerals from organic matter in the root zone
- Will not burn plants

DIRECTIONS FOR USE

SEED/SOD INSTALLATION Apply one 25 pound bag per 2000 square feet after installing sod or after seeding.

TOP DRESS FERTILIZING Specific application rate is based on the amount of nutrient desired. Consult the chart below for three rate level options.
